GRID RESILIENCE STATE AND TRIBAL FORMULA GRANTS: NEW HAMPSHIRE

As states, tribes, and territories face threats from severe weather, the **Grid Resilience State and Tribal Formula Grants** will distribute **\$2.3 billion** over five years to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate crisis. The first round of funding applies to fiscal years 2022 and 2023.

In support of President Biden's Investing in America agenda, in September 2023, the U.S. Department of Energy awarded **\$6,619,797** to **New Hampshire** via the Grid Resilience State and Tribal Formula Grants program, which is supported by the Bipartisan Infrastructure Law.

State awards are based on a formula that includes factors such as population size, land area, probability and severity of disruptive events, and a locality's historical expenditures on mitigation efforts. Under the administration of the **Executive Office of the State of New Hampshire**, New Hampshire will hold a competitive selection process to identify projects for which the roughly \$7 million in federal funding will be deployed.

GOALS INCLUDE

- › Investing in disadvantaged communities.
- › Reducing the frequency and/or duration of disruptive events.
- › Advancing projects that go beyond current resilience planning.
- › Leveraging existing workforce development and training opportunities.
